PROJECTS

React, Node,
Express, REST API,
Sass, Chart.js

React, Redux,
Node, Express,
MongoDB,
Material UI, AWS,
Heroku, JWT

React, Redux,
Node, Express,
REST API,
Firebase, JWT

Front-end Engineer Co-op

- Developed an E-learning platform using MERN stack and GraphQL in an agile environment.
- Worked with the UI team to ship responsive and isomorphic websites for cross-browser, monitors.

Full-stack Engineer Co-op

- Developed a MERN project for FDNY Research.
- Integrated with Fitbit and Garmin SDKs to design REST API for user data collection and storage.
- Used Highcharts for dashboard and reduced 30% latency for monitoring 20 users synchronously.

Front-end Engineer

- Built and maintained 10 reusable UI components using HTML, CSS, JavaScript(ES6), and jQuery.
- Performed code reviews reduced 30% of the technical debt within the first month.

Spotify Data Viz

- Web app to visualize user's profile, playlists, followers, recently played songs.
- Includes the frequently played songs and artists for within 4 weeks and 6 months.
- Creates and modifies playlists with recommended songs based on rhythm analysis.

Food Zone

- E-commerce website with User auth, check out with PayPal, add items to cart, admin upload, edit product, manage orders, post review, search, and sort products.

Fruit Chat

- Web app for cloning twitter's functionality such as post, comment, like, notification, deletion.
- Includes user authorization with JSON Web Token to manage login, register, and session.
- Responsive and minimal design for the chat app.
